ACHIEVEMENTS

Fiverr Level-2 Seller 88+👍

[Fiverr Level 2 Seller](#) – Mentored 100+ students in JavaScript & ReactJS with 80+ 5-star reviews. [Fiverr Gig](#)

PROJECTS

Lokkna (Barter trading platform)

- Created a **user-friendly front-end app** with NextJS, allowing people to barter trade easily.
- Created an API with Django Rest Framework to store user information and efficiently communicate with the front end.
- **Increased user communication** by building a private **1-on-1 live chat with Django Channels.**
- Implemented secure and user-friendly authentication using **JWT in Django** with OAuth support.
- Provided ongoing support/maintenance for optimal software performance and reliability.
- **Technologies Used: NextJS, Python, JavaScript/TypeScript, Django, DRF, Channels, Tailwind CSS ,Redux,RTKQuery.**
- **Links: API Docs, <https://www.lokkna.com>**

Dtrust (Decentralized Trust - Ethereum)

- Built **complete frontend architecture** using **NextJS and Material UI** for decentralized trust management.
- Implemented **Web3 authentication and wallet integration** using **Thirdweb SDK** for secure user access.
- Developed a **user data management system** with **Sanity.io** for trust records and user information.
- Created a **comprehensive test suite** for smart contract functions, achieving **high test coverage.**
- Engineered a **responsive dashboard** for trust creation, fund management, and beneficiary operations.
- [Demo Video](#), [Demo Website](#), [Smart-Contract Test Coverage](#)
- **Tech Stack: NextJS, TypeScript, Material UI, Web3.js, Thirdweb, Solidity, Hardhat, Sanity.io.**
